Project: Wyandanch Sewer Extension
Location: Suffolk County, NY

Project Details:

Installation of two crossings utilizing guided pilot boring. First crossing was 290 LF in length @ .18% slope consisting of a 36" steel casing with a 20" DR-18 carrier pipe. Second crossing was 228 LF in length @ .12% consisting of a 30" steel casing with an 18" DR-18 carrier pipe. Carrier pipes were installed within the steel sleeves on AEI's custom fabricated rail system. Once carrier pipes were installed the annular area then was filled with grout.

Final Product: Sanitary Sewer System
Geology: Sand

Project Profile

MicroTunneling- Guided Pilot Boring

Completion Date

April 2016

Installation Methods:

MicroTunneling- Guided Pilot Boring
 Grouting

Markets Served:

Sewer & Water

Owner:

Town of Babylon

Engineer:

H2M Group

Contractor:

Bove Industries
